Getting Started with Inklingo

Linda Franz has a new series of downloadable shape collections that will revolutionize the way you prepare patches for machine piecing, hand piecing and appliqué!

Inklingo (patent pending) prints ultra-fine color lines on fabric with any ordinary color Inkjet printer—and the lines don't show in the finished quilt!

It's as easy as printing an e-mail but Linda provides excellent illustrated instructions, and there is a free shape collection on her web site. **Download it today and start printing.** The first chapter of The Inklingo Handbook is included in the free collection and there is a demo video on her web site too. <http://www.inklingo.com>

Inklingo prints cutting and stitching lines on fabric, and that eliminates measuring (and mistakes), tricky templates, funny markers, weird rulers and light boxes, plus it allows you to cut with a rotary cutter OR scissors.

Every piece is aligned on straight grain (hooray), and dog ears are eliminated. Inklingo uses a tiny amount of ordinary Inkjet ink in 20 different colors which show on almost any fabric, and which will fade or wash out of the finished quilt.

“Seeing Inklingo reminds me of the first time I saw a rotary cutter,” according to one Inklinguist. Inklingo is fabulous for young, cool quilters, and for mature, wise quilters, whether they use a rotary cutter or scissors.

Projects that looked too complicated before Inklingo are suddenly back on the to-do list, and that is good for all of us—quilters, designers, teachers and shops. It's always more fun when everything turns out perfectly, and online Inklingo quilters (Yahoo) are definitely having fun.

Any designer can create quilt patterns to use with Inklingo shapes, and special collections for classic and new designs will be available on request. Inklingo is stunningly simple, and allows quilters to complete more projects. See sample pages and all of the newest collections on the web site.

In the next several months, you can expect to see a wide variety of appliqué designs, more sizes of hexagons and triangles, AND classic designs like The Jane Austen Quilt, Double Wedding Ring, Drunkard's Path, Tree of Life, Carolina Lily, Elongated 45° Hexagons, Hunter's Star, Lone Star, Feathered Star, Birds in the Air, Octagons, Orange Peel, Dahlia, Apple Core, Fans, Tumbler, Clam Shell, Pickle Dish, Baskets, Peony, Storm at Sea, and more!

"If there were an Academy Award for innovative ideas in quilting tools, Inklingo would win it for sure!" - Cathi

"I think this is the "next revolution" in quilting, equal to the rotary cutter, paper piecing, acrylic templates and Internet lists." - Mary
