FAQ

WHAT PRINTER?

Any ordinary Inkjet printer—like yours! Print shapes on the wrong side of the fabric with the Inkjet printer and color ink cartridge you have already. Fabric feeds smoothly through an Inkjet printer when it is ironed to freezer paper. It prints just like paper.

Any ordinary color Inkjet printer will allow you to print custom sizes to use fabric efficiently.

DO I HAVE TO LEARN NEW SOFTWARE?

No! Pages of Inklingo shapes are organized in PDF files which open with Adobe Reader. There is no software to install. Just enter the page number (or use the bookmark feature) to print the page with the shape and ink color you need. It's simple but you will want to read our tips too.

WHAT COLORS?

There are 20 Inklingo colors which are designed to wash out—but even if they don't, they do not show in the finished quilt. It is simple to choose the page with the best color of ink.

IS THIS JUST FOR HAND PIECING?

No! Sew by machine or sew by hand with a running stitch, or combine hand and machine stitching for a “hybrid.” Inklingo introduces new, simpler ways to stitch. There are instructions for piecing and appliqué on the web site and in *The Inklingo Handbook*.

CAN A BEGINNER DO THIS?

Yes! Inklingo is perfect for beginning quilters and for children too. Cut with a rotary cutter *or* scissors. No measuring! Just cut and sew along the lines. There is straight grain on every piece. Inklingo makes it easier than ever to start quilting.
