Inkingo (US Patent 7,814,832) prints ultra-fine color lines on fabric with any ordinary color Inkjet printer, so you can cut shapes without measuring or templates and so you can sew on a line—and the lines don't show in the finished quilt!

Inkingo Shape Collections are big PDF files which open with Adobe Reader. Fabric goes through the printer just like paper when it is ironed to freezer paper.

Inkingo shapes are arranged in layouts to use fabric efficiently—all ready for you to print. Whether you machine piece, hand piece or appliqué, everything is faster and simpler when you have the cutting and sewing lines printed on the fabric.

"If there were an Academy Award for innovative ideas in quilting tools, Inkingo would win it for sure!" - Cathi

You can order and download a free "shape collection" with Diamonds, Triangles & Squares (\$20 value) and print Inkingo shapes in the next few minutes. The first chapter of *The Inkingo Handbook* is included, so you have everything you need to get started.

Three simple things work together to make Inkingo perfect for quilters.

1. Test Page

Print a test on a scrap of fabric so you can be sure the ink in *your* printer will wash out even after pressing. All 20 Inkingo colors probably will wash out.

It doesn't hurt to leave ink in the quilt but you need to test to be sure it will not bleed or show on the front. Test Pages give you confidence. Testing is one of the "Top Ten Tutes" on the All About Inkingo blog.

2. Custom Page Sizes

Inklingo uses a feature in the software of ordinary printers which allows you to print any size, so you can use fabric efficiently and get exactly the number of shapes you need.

Before Inklingo I did not know I could enter other sizes in the print dialog box. Custom Page Sizes are easy and there are step-by-step instructions under the Support & Goodies tab on inklingo.com.

3. Layouts of Shapes

I recommend an ordinary 8.5 inch wide printer for Inklingo but all of the layouts are 13 x 19. This gives us many more options for printing exactly what we need without wasting fabric. Sometimes 11.75 or 13 inches is just the right length. Inklingo is especially good for using up scraps or jelly rolls.

“Sometimes a product appears on the market that is truly ground breaking. I think this is the case with Inklingo.”

“Seeing Inklingo reminds me of the first time I saw a rotary cutter,” says one shop owner. Inklingo is fabulous for young, cool quilters and for mature, wise quilters—whether they use a rotary cutter or scissors.
